

BRASS KNUCKLE GANG

2m CW or bust.

Amateur radio is best when it asks something of you. We pound brass on 2 meters, the purest and most demanding way to get on the air.

- 1. GROW THE CODE.** Morse is the real thing. Grow the ranks who can send and copy CW, and lower the barrier for the curious.
- 2. CLAIM 2 METERS.** 144 MHz is our home. Put activity back on the band until Morse on VHF is ordinary to hear again.
- 3. BRING BACK THE TINKER.** Build your own antennas, roll your own gear, and try modes nobody has touched in years.
- 4. BUILD THE CREW.** Know the operators in your own backyard. Meet in person, mentor newcomers, and grow as one crew.

GET ON THE KEY. GET ON 2 METERS.
